

# 49 *and* MARKET

## VINTAGE ARTISTRY EVERYWHERE CLUSTER KIT

### TOOLS REQUIRED:

Paper Trimmer, Double-Sided Tape or Glue, Craft Knife and Scissors.

Optional: Foam Tape & Sanding Tool.

**PREPARATION:** Carefully remove all the laser cut pieces and printed chipboard from the packaging. Using a craft knife, turn to the reverse of the sheet and carefully cut the “pins” or nodules off each of the pieces. Sand off any residue of the nodules to leave a smooth edge.

Tip: Look at the finished piece image - if pieces won't show, you can trim back unseen portion of laser cuts to use elsewhere.

# CLUSTER #1

Assemble pieces shown. The blue cord and three wooden clips will be found in the trinket bag. Map frame, "we're on vacation", "vacation" and orange button are on the chipboard sheet. All other pieces are from the laser cut elements.

Begin assembling the cluster by starting with approximately an 11" piece of blue cord. Adhere pieces shown above (small postcard with orange label, small map banner piece, blue notebook ephemera and the wooden frame with a photo behind it).

Next, add the larger map banner, geo frame and the chipboard map frame with a photo behind it.

Continue adding bits.... Add the map tag and butterfly on the left side. Next, add the chipboard "Vacation" and "We're on Vacation" banner. Finish by adding a white wooden clip.

Finishing touches... Add the stamp, blue heart and orange button to center bottom. Create a small bow from the blue cording provided in the trinket bag. Clip the bow with a wooden clip and add another to the center.

# CLUSTER #2

Begin by assembling the various pieces shown. The blue cord and three wooden clips will be found in the trinket bag. The two map frames, geo tag, camera spot and blue buttons are on the chipboard sheet. All other pieces are from the laser cut elements.

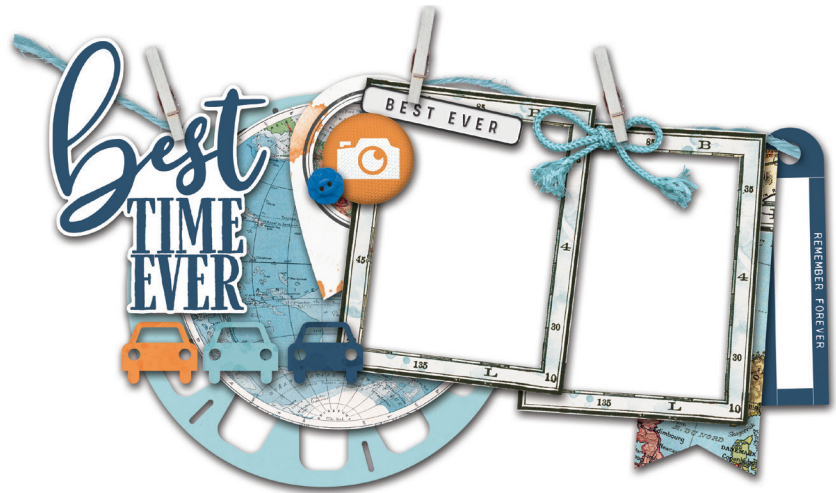

Start to assemble and adhere pieces together. Use approximately an 11" piece of cord. Adhere pieces as shown above.

Adhere photos behind the two map frames and then add to cluster. Add "Best Ever" sign.

Add the "Best time ever" title piece to the left side. Add the 3 cars below. Add the camera spot in the center of the geo frame. Note - you may want to add some foam tape or a piece of unused chipboard to even out this piece as it will sit on top of the frame.

Finishing touches... As done in the previous cluster, use cord to make a small bow and clip together with a wooden clip. Add the blue button and the other two wooden clips.

## CLUSTER #3

Begin by assembling the various pieces shown. Blue clip and cord can be found in trinket bag. The sphere, blue heart, "See Places" circle and blue button are from the chipboard sheet. All else are from the laser cuts.

Start to assemble and adhere pieces together. The diagonal stripe remnant serves as the base. Next add the large map remnant and sphere. Place the smaller map remnant on top followed by the blue stamp piece.

Finish the cluster by adding the second stamp with "Just Go" on it. Add blue heart and "See Places". Finish by creating a bow that gets clipped and add the 2 button pieces.

## CLUSTER #4

Assemble the pieces shown. The metal clip is in trinket bag. The "Life with you...." circle and blue button are on the chipboard sheet. All other pieces are from the laser cut elements.  
Note - there are several banner titles to chose from.

Start to assemble and adhere pieces together. Use the large map remnant piece as your base and build up. Next add the wide tag followed by tag with postage on it. Finish with the diagonal stripe slide frame.

Continue to embellish the cluster by adding the chipboard circle, buttons and banner. Add clip as the finishing touch.
